Medicinal Compound.

POGGIOLI'S SPECIFICATION.

A.

TO ALL TO WHOM THESE PRESENTS SHALL COME, I, PAUL JOSEPH POGGIOLI, of Paris, in the Empire of France, Gentleman, send greeting.

WHEREAS Her present most Excellent Majesty Queen Victoria, by Her
5 Royal Letters Patent under the Great Seal of the United Kingdom of Great Britain and Ireland, bearing date at Westminster, the Twenty-sixth day of August, in the fifteenth year of Her reign, did, for Herself, Her heirs and successors, give and grant unto me, the said Paul Joseph Poggioli, my exors, admors, and assigns, Her especial license, full power, sole privilege and
10 authority, that I, the said Paul Joseph Poggioli, my exors, admors, and assigns, or such others as I, the said Paul Joseph Poggioli, my exors, admors, and assigns, should at any time agree with, and no others, from time to time and at all times during the term of years therein expressed, should and lawfully might make, use, exercise, and vend, within England,
15 Wales, and the Town of Berwick-upon-Tweed, and in the Islands of Guernsey, Jersey, Alderney, Sark, and Man, and also in all Her said Majesty's Colonies and Plantations abroad, my Invention of "AN IMPROVED MEDICAL COMPOUND;" in which said Letters Patent there is contained a proviso that I, the said Paul Joseph Poggioli shall cause a particular description of the nature of my
20 said Invention, and in what manner the same is to be performed, by an

Poggioli's Improved Medicinal Compound.

instrument in writing under my hand and seal, to be enrolled in Her said Majesty's High Court of Chancery within six calendar months next and immediately after the date of the said in part recited Letters Patent, as in and by the same, reference being thereunto had, will more fully and at large appear.

NOW KNOW YE, that in compliance with the said proviso, I, the said Paul Joseph Poggioli, do hereby declare that the nature of my Invention, and the manner in which the same is to be performed, are particularly described and ascertained in and by the following statement thereof, that is to say:—

My Invention consists in a new kind of ointment, the composition of which the formula is hereafter given, is intended for the purpose of curing neuralgia, head-ache, rheumatism, even gout and sciatica, disorders of the same class, and in general all throbbing pains. This ointment is to be externally applied upon the disordered parts, and in most instances two or three frictions are sufficient to obtain a cure. It may be preserved without alteration for years, and has the advantage of not producing any irruption or irritation even upon the most delicate skin. This ointment may be made white or colored, at will.

Formula for making the ointment:—

1st. Salt of morphine (hydrochlorate) ten grains (or fifty centigrammes French weight).

2nd. Extract of belladonna (four grains) (or twenty centigrammes), or atropine for a white color.

3rd. Populeum ointment, three hundred grains, or fifteen grammes.

4th. Axunge, being macerated twenty-four hours in leaves datura stramonium in sufficient quantity, that is to say, about three hundred grains (fifteen grammes). The whole scented with some drops of mint water, or with cherry water.

Application of the ointment.—The quantity to be used for each friction is about five grains, except for sciatica; in this case it ought to be about double that quantity. It is applied gently with the soft extremities of the fingers, and should remain at least twenty minutes on the affected part. Between the frictions there should be an interval of three or four hours. An emollient poultice or diaculum to be applied on the affected part after the friction. The frictions must be discontinued when the pain has subsided; this generally takes place after the first, second, or third frictions.

Without limiting myself to the exact proportions above indicated, I claim the combination of matters herein indicated, forming my "Im-

Poggioli's Improved Medicinal Compound.

proved Medical Compound," applicable to the cure of the complaints above mentioned.

In witness whereof, I, the said Paul Joseph Poggioli, have hereunto set my hand and seal this Seventeenth day of February, in the year of our Lord One thousand eight hundred and fifty-three.

PAUL JOSEPH (L.S.) POGGIOLI, D. P.

Taken and acknowledged by Paul Joseph Poggioli (party hereto) at Paris, in the Empire of France, this Seventeenth day of February, 1853, before me,

THOMAS PICKFORD,
Her Britannic Majesty's
Consul at Paris.

This is the Specification marked A referred to in the affidavit of Auguste Edouard Loradoux Bellford, sworn before me this 26 day of February, 1853.

D. DREW.

Auguste Edouard Loradoux Bellford, of 16, Castle Street, Holborn, in the County of Middlesex, maketh oath and saith, that he is acquainted with the manner and character of the handwriting of Thomas Pickford, Her Britannic Majesty's Consul at Paris, in the Empire of France. And this deponent further saith that the signature "Thomas Pickford," set, subscribed, or written in the margin of the Specification hereunto annexed, marked A, and dated the Seventeenth day of February instant, and purporting to be executed by Paul Joseph Poggioli, of Paris, whereby it is stated that the Specification was acknowledged by him, the said Paul Joseph Poggioli, before the said Thomas Pickford, on the Seventeenth day of February, at Paris aforesaid, is of the proper handwriting of the said Thomas Pickford.

AUGUSTE EDOUARD LORADOUX BELLFORD.

Sworn at the Inrolment Office, Chancery Lane, in the County of Middlesex, the Twenty-sixth day of February, Eighteen hundred & fifty-three, before me,

D. DREW.

Poggioli's Improved Medicinal Compound.

By Affd^t.

AND BE IT REMEMBERED, that on the oath of Auguste Edouard Loradoux Bellford, the Specification aforesaid was enrolled word for word as above written. And also the Specification aforesaid was stamped according to the tenor of the Statute made for that purpose.

Enrolled the Twenty-sixth day of February, in the year of our Lord One 5 thousand eight hundred and fifty-three.
